

Mathematics Department Calculus II (SCIENCE) 201-NYB-05 Section 2 Winter 2012

**Instructor:** Yann Lamontagne

**Office:** 3B.19

**Office Hours:** Office hours are posted beside the door of office 3B.19 and

http://bit.ly/yfthFz

**Telephone:** (514) 931-8731 #1252

E-mail: ylamontagne@dawsoncollege.gc.ca

Website: http://www.obeymath.org

The solutions to the quizzes and tests as well as additional examples are posted on the website. The material of previously taught courses

is also available.

**Teacher Accessability:** For out of class communication please see me during my office hours.

**Term Work:** (possibly worth 50% of final grade, see Grading Policy):

3 Class Tests\* worth a total of 40% on:

Test 1 Tuesday February 28th in room 4C.1
Test 2 Tuesday April 3rd in room 4C.1
Test 3 Tuesday May 1st in room 4C.1

Quizzes\*\* worth a total of 10% on:

every Tuesday except on test days

#### **Important:**

- There will be no make-up tests or quizzes. If a valid medical note is presented the weight of the quiz or test will be transferred to the weight of the final examination.
- Students who will be absent for any predictable reason on a quiz/test day must inform their teacher in writing within the first two weeks of the semester of their intent to be absent so that alternative arrangements can be made at the earliest opportunity. The written notice must be given even when the exact date is not known until later.
- Please note that I do **not** use Omnivox MIO, and messages sent to MIO are unfortunately ignored.

<sup>\*</sup> Each class test is an hour and half in duration.

<sup>\*\*</sup> Each quiz is 15 minutes in duration. The content of the quizzes is mostly taken from the assigned excercises of previous lectures.

# Mathematics Department Calculus II- Science 201-NYB-05

## **Course Objectives:**

This course introduces the student to Integral Calculus, to the techniques of integration and to some of the applications of integration to physical problems. Another look at limits and an introduction to the topic of infinite series are included. For more details, see pages 44 to 49 of the Dawson Science Program.

## **Course Competencies:**

*This course will allow the student to fully achieve the competency:* 

**00UP:** To apply the methods of integral calculus to the study of functions and problem solving,

#### *Elements of the competency:*

- 1. To determine the indefinite integral of a function.
- 2. To calculate the limits of indeterminate forms.
- 3. To calculate the definite integral and the improper integral of a function on an interval.
- 4. To express concrete problems as differential equations and solve simple differential equations.
- 5. To calculate, areas, volumes, lengths and work and make two- and three-dimensional drawings.
- 6. To analyze the convergence of series.
- 7. To use mathematical software with Calculus II problems.

#### *This course also contributes to the partial achievement of the competency:*

**00UU:** To apply what they have learned to one or more subjects in the sciences,

#### Elements of the Competency:

- 1. To identify the scientific aspects of a given topic from an interdisciplinary perspective.
- 2. To transfer what they have learned to situations requiring the contribution of more than one discipline.
- 3. To apply systematically an experimental method.
- 4. To solve problems.
- 5. To use data processing technologies.
- 6. To reason with rigor.
- 7. To communicate clearly and precisely.
- 8. To show evidence of independent learning in the choice of documentation or laboratory instruments.
- 9. To work as members of a team.
- 10. To make connections between science, technology and the evolution of society.
- 11. To identify the underlying values underlying their treatment of a topic.
- 12. To place scientific concepts used in a historical context.
- 13. To show attitudes appropriate for scientific work.

## **Pre-Requisite:**

Good standing in Calculus I (201-NYA/201-NYA-05) preferably the Science version or equivalent.

**Pondération:** 3-2-3

### **Evaluation Scheme and Schedule:**

The Institutional Student Evaluation Policy (ISEP) is designed to promote equitable and effective evaluation of student learning and is therefore a crucial policy to read and understand. The policy describes the rights and obligations of students, faculty, departments, programs, and the College administration with regard to evaluation in all your courses, including grade reviews and resolution of academic grievance. ISEP is available on the Dawson website.

### **Term Work:**

The term work is based on a minimum of  $4\frac{1}{2}$  hours of tests/quizzes. A minimum of 3 class tests will be given.

## **Final Examination:**

The Final Examination will be a supervised, comprehensive examination held during the formal examination period.

## **Grading Policy:**

The grade shall consist of the greater of:

- a) Termwork for 50% and Final Exam for 50% OR
- b) Final Exam for 100%.

To qualify for b) the student must have obtained at least 50% of the term mark and must have written more than 50% of the class tests.

To pass the course, the students must obtain at least 60%.

# **Required Text and Materials:**

<u>Text</u>: The required text is <u>Single Variable Essential Calculus – Early Transcendals by James Stewart</u>

**References:** 1) Calculus of a Single Variable – (8<sup>th</sup> edition), by Larson, Hostetler and Edwards

- 2) Calculus Single Variable 5<sup>th</sup> edition by James Stewart
- 3) Calculus by Edwards & Penny,

Or any standard text book on Calculus of a Single Variable.

<u>Calculators</u>: A scientific calculator, which has no text storage or graphing capabilities, is allowed for class tests and the final exam.

# **Teaching Methods:**

Lectures and problem sessions

## **Attendance and Course Participation Requirements:**

Students should refer to the Institutional Student Evaluation Policy (ISEP section III-C) regarding attendance.

Attendance is recommended for the successful completion of the course.

### **Literacy Standards:**

Problem solving is an essential component of this course. Students will be expected to analyze problems stated in words, to present their solutions logically and coherently, and to display their answers in a form corresponding to the statement of the problem, including appropriate units of measurement. Marks will be deducted for work which is inadequate in these respects, even though the answers may be numerically correct.

## **Student Obligations**

- a) Students have an obligation to arrive on time and remain in the classroom for the duration of scheduled classes and activities.
- b) Students have an obligation to write tests and final examinations at the times scheduled by the teacher or the College. Students have an obligation to inform themselves of, and respect, College examination procedures.
- c) Students have an obligation to show respectful behavior and appropriate classroom deportment. Should a student be disruptive and/or disrespectful, the teacher has the right to exclude the disruptive student from learning activities (classes) and may refer the case to the Director of Student Services under the Student Code of Conduct.
- d) Electronic/communication devices (including cell phones, mp3 players, etc.) have the effect of disturbing the teacher and other students. All these devices must be turned off and put away. Students who do not observe these rules will be asked to leave the classroom.

Everyone has the right to a safe and non-violent environment. Students are obliged to conduct themselves as stated in the Student Code of Conduct and in the ISEP section on the roles and responsibilities of students. (ISEP section II-D)

# **Academic Integrity:**

#### I) Cheating in Examinations, Tests, and Quizzes

Cheating includes any dishonest or deceptive practice relative to formal final examinations, in-class tests, or quizzes. Such cheating is discoverable during or after the exercise in the evaluation process by the instructor. Such cheating includes, but is not limited to:

- a) Copying or attempting to copy another's work.
- b) Obtaining or attempting to obtain unauthorized assistance of any kind.
- c) Providing or attempting to provide unauthorized assistance of any kind.
- d) Using or possessing any unauthorized material or instruments which can be used as information storage and retrieval devices.
- e) Taking an examination, test, or quiz for someone else.
- f) Having someone take an examination, test, or quiz in one's place.

#### **II) Unauthorized Communication:**

Unauthorized communication of any kind during an examination, test, or quiz is forbidden and subject to the same penalties as cheating.

### III) Plagiarism on Assignments and the Comprehensive Examination

Plagiarism is the presentation or submission by a student of another person's assignments or Comprehensive Assessment as his or her own. Students who permit their work to be copied are considered to be as guilty as the plagiarizer.

#### IV) Penalties

Cheating and plagiarism are considered extremely serious academic offences. Action in response to an incident of cheating and plagiarism is within the authority of the teacher.

Penalties may range from zero on a test, to failure in the course, to suspension or expulsion from the college.

According to ISEP, the teacher is required to report to the Sector Dean all cases of cheating and plagiarism affecting a student's grade. (See ISEP section IV-C.)

### **Intensive Course Conflicts & Policy on Religious Observance:**

If a student is attending an intensive course, the student must inform the teacher, within the first two weeks of class, of the specific dates of any anticipated absences.

Students who wish to observe religious holidays must also inform each of their teachers in writing within the first two weeks of each semester of their intent to observe the holiday so that alternative arrangements convenient to both the student and the teacher can be made at the earliest opportunity. The written notice must be given even when the exact date of the holiday is not known until later. Students who make such arrangements will not be required to attend classes or take examinations on the designated days, nor be penalized for their absence.

It must be emphasized, however, that this College policy should not be interpreted to mean that a student can receive credit for work not performed. It is the student's responsibility to fulfill the requirements of the alternative arrangement.

Students who intend to observe religious holidays or who take intensive courses must inform their teachers in writing as prescribed in the ISEP Policy on Religious Observance. (ISEP Section III-D).

A form for this purpose is available at the end of this document.

# **Math Tutorial Room:**

Volunteer math teachers are available for help in room 7B.1 from 10:00 to 16:00 (Monday through Friday) and from 17:00-18:00 (Monday through Thursday).

# **Course Content & Tentative Schedule (see next page):**

(Number of classes listed is approximate)

Specific Competencies	Learning Activities	Sections & Problems
Antiderivatives (review)	- Area under a simple curve using Riemann sums	s4 7. Antiderivatives n246 1-30.33-41.44 (review)
Reimann Sums	- Definite Integral as the limit of a Riemann sum.	8.00 m. 250, 49-56 Review n250, 49-56
The Fundamental Theorem	- Proof of the Fundamental theorem of Calculus.	s5.1: Areas and Distances. n260.1.3.5: 11-14
of Calculus	- Substitution Method	s5.2. The Definite Integral n273 1 3 5.11-26.29-42 46 47 49 51
	- Average Value of a Function.	s5.3: Evaluating Definite Integrals n282, 1-30, 35-38, 41-46, 63
	- Mean Value Theorem for Integrals	\$5.4: Fundamental theorem of Calculus. p291. 1-20: 23*-25*. 27*. 31*
		\$5.5: Substitution. p299, 1-54, 61*-65* review of indefinite integrals
		Review n302. 7-29. 31-32. 35-39. 42. 46. 51*-54*
		True-False Quiz, p300 1-13
Techniques of Integration	- Integration by Parts	§6.1: Integration by Parts p304, 1-31, 42*-44*
	- Trigonometric Integral using Identities	§6.2: Trigonometric Integral and Substitutions p319, 1-62
	- Trigonometric Substitutions	§6.3: Partial Fractions p327, 1-42, 44*, 46*
	- Partial Fractions	Review p355, 1-40
		True-False Quiz*, p354 1-7, 9-14
Numerical Integration	- Approximate certain integrals using Simpson's Rule	§6.5: Approximate integration p343, 7-16
(optional)		Review p356, 57, 58
Indeterminate Forms and	- Evaluate Limits of Indeterminate Forms using L'Hopital's	§3.7: Indeterminate Forms and L'Hopital's Rule p193, 1-36, 47*-50*
L'Hopitals Rule <i>(review)</i>	Rule	Review p197, 67-82
Improper Integrals	- Determine the Convergence of Improper Integrals	§6.6: Improper Integrals p352, 1-2, 5-32, 47, 48*, 49*, 52*, 61*, 62*
		Review p355, 41-50
Applications of Integration	- Extend the notion of the Definite Integral to calculate:	§7.1: Areas between curves, p361, 1-16, 21, 29*, 31*-37*
	- The area bounded between two curves	§7.2: Volumes p370, 1-16, 21, 22, 25
	- The volume of a solid of revolution: disk, washer, and	§7.3: Volumes by shell method p376, 1-26, 33-39, 41
	shell methods	§7.4: Arc length p383, 1-10; 12-14
	- Arclength	§7.5: Applications to Physics and Engineering p394
	- Applications to Physics and Engineering (optional)	Review p408, 1-14, 25, 26
Infinite Sequence	- Convergence or divergence of Infinite Sequences	§8.1: Sequences p419, 1-28; 33-36, 46*
Infinite Series	- Sum of an infinite series from the definition.	§8.2: Series p427, 1-32, 35*, 39*
	- Geometric and Telescoping series: applications	§8.3: The integral and comparison tests p436, 3, 4, 6-26, 27*
	- Tests for convergence of series:	§8.4: Other convergence tests p446, 19-39, 40*, 42a*
	Integra test	§8.5: Power series p451 3-21
	Comparison limit Comparison tests	Review p480, 1-29
	Ratio and root tests	True-False Quiz*, p479 1-12, 14-18
	Alternating series test	
	- Illuerval of colliver genice of a power series	
Taylor and MacLaurin Series	<ul> <li>Finding the Taylor and MacLaurin series using their definition.</li> </ul>	§8.7: Taylor and MacLaurin Series p469, 1-8, 11-18 Review, p480, 43-50

## RELIGIOUS OBSERVANCE/ INTENSIVE COURSES FORM

Students who intend to observe religious holidays or who take intensive courses must inform their teachers in writing as prescribed in the ISEP Policy on Religious Observance. (ISEP Section III-D)

The following form must be submitted within the first two weeks of classes.

Name:			
Student Number: _			
Course:		 	
Teacher:			
Date:	Description:
